Value of Discord

Technogeography Studio Project

This project explores GIFs as a visual language of communication on Discord. By collecting GIFs from users, I analyse them as reactions, jokes, emotions and traces of community culture. The final outcome.....

Split in half

1st glassblowing project

The story of this shotglass is short. It was made out of two separate pieces of coloured glass, that were connected together to create an effect of split inside glass.

PRODUCT DESIGN

2025-ONGOING / CREATOR

PoliTalks

UI/UX class final

PoliTalks is a digital platform concept that rethinks how people talk about politics online. Simply it is a anti-Tinder—Omegle crossover, about politics. Instead of chaotic comment sections and algorithm-fueled outrage,...

SOCIAL DESIGN

2023-2026 / CREATOR

Fake-PBR

Visual style development

Fake-PBR is a visual style I have developed and refined over several years. It is based on manually creating the illusion of realistic materials without relying on full 3D rendering or physically.....
